

SEASAP feed

SEASAP feed (alge extract liquid) a seaweed based animal feed enhancer can be used in all animal feeds that are regularly fed such as dairies, feed lots (sheep and cattle), piggeries, and grower chickens

From a dairy perspective we have trialled our **SEASAP** liquid product and have seen an overall healthier animal better conversion of the feed stabilising of the milk elements and in most cases additional milk flow. Good for calf rearing as well.

From a feed lot perspective faster animal rotation & weight gain and an overall healthier animals for chickens, expect a reduction in mortality of up to 60% by using **SEASAP** and they have also found the issue of leg weakness in the growing chickens is heavily reduced at the same time.

SEASAP p&c

SEASAP pasture&crop (alge extract liquid), again a seaweed based product focused on getting increased yield from your pastures and crops, foliar spray for orchards, vineyards, dosed into pivot irrigators or sprayed via boom on lucerne, cereals and other crops

Our supplier is currently trialling an organic fly and insect replant which we hope to release later this year. Indeed all of our products have organic certification and are allowable inputs into Australian organic farming systems

Of course all our products work just as well in traditional farming systems as you would expect

Pinnacle Products is an Australian owned company based in the Goulburn Valley, Victoria where we aggregate and dispatch our products

Our products are imported from India and meet all Australian import and Agriculture Department requirements

SEASAP is derived from versatile **Red**, **Brown** and **Green** Indian seaweeds, rich in trace elements, minerals, amino acids, microalgae enzymes, pigments and vitamin precursors

SEASAP p&c

(Algae extract Liquid) Pasture and crop ENAHANCER

Liquid Algae pasture and crop enhancer is an organic seaweed extract derived from versatile and nutritional Red, Brown & Green Marine Algae. It is a concentrate and mixed with water intended to be watered-in or sprayed on the foliage. This product does not have to be broken down like other organic fertilisers or Algal meal the nutrients are immediately available to the plant. It is fast acting and generally its effects are fairly quick to notice. The liquid algae fertilizer enhancer is fast-acting and should be part of a regular feeding program.

BENEFITS:

Reported to increase the yield by 10% to 20% our unique formulation induces drought resistance. Improves the immunity and resistance of the plants. Increases Photosynthesis rapidly improves flowering and intensifies the colours, reduces weathering of young flowers and fruits Strengthens the roots and their absorption increases the size and weight of the seeds. Enhances Seed Germination and Vigour Strengthens the plant shoot system

DOSAGE RATES:

For all kinds of vegetables, greens and flowering plants..... Dilute 50ml of SEASAP in 10Litres of water and apply as foliar spray. For pasture and cereals use 2-4litre of SEASAP in 100litres of water/hectare. For fruit trees and other annuals dilute 10ml of SEASAP in 100ml of water and apply as root treatment. For best results use 10ml of SEASAP in 100ml of water/tree. All vegetable plants dilute 50ml of SEASAP in 10 litres of water and apply as foliar spray. For best results increase the concentration to 50ml of SEASAP in 10Litres of water. For seed treatment dilute 10ml of SEASAP in 10Litres of water and soak the seeds overnight

Shake well before use

SEASAP is derived from versatile Red, Brown and Green Indian seaweeds, rich in trace elements, minerals, amino acids, microalgae enzymes, pigments and vitamin precursors.
